CONTENTS

Volume 7, Issue Nos. 1–4

International Journal for
NUMERICAL METHODS IN ENGINEERING

Issue No. 1, 1973

E. C. Anderson and C. H. Lewis: Non-reacting and Equilibrium Chemically Reacting Turbulent Boundary–layer Flows 3

K. K. Gupta: Eigenproblem Solution by a Combined Sturm Sequence and Inverse Iteration Technique 17

A. Konrad and P. Silvester: Triangular Finite Elements for the Generalized Bessel Equation of Order *m* 43

J. L. Milton and W. P. Goss: Stability Criteria for Explicit Finite Difference Solutions of the Parabolic Diffusion Equation with Non-linear Boundary Conditions 57

J. P. Bindon: Stability and Convergence of Streamline Curvature Flow Analysis Procedures 69

SHORT COMMUNICATIONS

C. J. Bates: A Computational Technique for the Efficient Handling of Large Matrices 85

V. Hoppe: Specification of Geometrical Parameters for Elements with Cubic Mapping Functions 94

M. Zlámal: A Remark on the 'Serendipity Family' 98

Issue No. 2, 1973

J. O. Mingle: Computational Considerations in Non-linear Diffusion 103

C. H. Cooke: A Characterization of Stiffly Stable Linear Multistep Methods 117

U. Kirsch: Optimized Prestressing by Linear Programming 125

D. J. L. Smith and H. Merryweather: The Use of Analytic Surfaces for the Design of Centrifugal Impellers by Computer Graphics 137

B. M. E. De Silva and G. N. C. Grant: Comparison of Some Penalty Function Based Optimization Procedures for the Synthesis of a Planar Truss 155

A. D. Tuff and A. Jennings: An Iterative Method for Large Systems of Linear Structural Equations 175

V. A. Vysloukh, V. P. Kandidov and S. S. Chesnokov: Reduction of the Degrees of Freedom in Solving Dynamic Problems by the Finite Element Method 185

H. B. Harrison: Post-buckling Analysis of Non-uniform Elastic Columns 195

T. S. Chow and J. S. Kowalik: Computing with Sparse Matrices 211

SHORT COMMUNICATIONS

J. T. Oden and J. E. Key: Analysis of Static Non-linear Response by Explicit Time Integration 225

M. Svoboda and M. Sahm: Some Comments on the Equation Block Solver 227

W. L. Wood: Note on a Modified Conjugate Gradient Method 228

E. F. Boyle and A. Jennings: Accelerating the Convergence of Elastic–Plastic Stress Analysis 232

D. B. Wilson, H. Y. Tsao and A. R. Shouman: A Method for Numerically Solving Second-order Non-homogeneous Linear Differential Equations with Variable Coefficients 235

Announcement 240

Issue No. 3, 1973

C. S. Desai and L. D. Johnson: Evaluation of Some Numerical Schemes for Consolidation 243

T. Belytschko and B. J. Hsieh: Non-linear Transient Finite Element Analysis with Convected Co-ordinates 255

R. D. Krieg and S. W. Key: Transient Shell Response by Numerical Time Integration 273

D. G. Harrison and Y. K. Cheung: A Higher-order Triangular Finite Element for the Solution of Field Problems in Orthotropic Media 287

P. Tong, T. H. H. Pian and S. J. Lasry: A Hybrid-element Approach to Crack Problems in Plane Elasticity 297

V. Kolář and I. Němec: The Efficient Finite Element Analysis of Rectangular and Skew Laminated Plates 309

K. Ganesan, E. Moore and W. J. Vetter: On Convergence of Newton's Method for Load Flow Problems 325

L. T. Isaacs: A Curved Cubic Triangular Finite Element for Potential Flow Problems . 337

G. Aguirre-Ramirez and J. T. Oden: Finite Element Technique applied to Heat Conduction in Solids with Temperature Dependent Thermal Conductivity 345

P. Dewhurst and I. F. Collins: A Matrix Technique for Constructing Slip-line Field Solutions to a Class of Plane Strain Plasticity Problems 357

G. Sander, C. Bon and M. Geradin: Finite Element Analysis of Supersonic Panel Flutter 379

SHORT COMMUNICATIONS

R. Parker and C. Y. Ma: Normal Gradient Boundary Condition in Finite Difference Calculations 395

H. Takemoto and R. D. Cook: Some Modifications of an Isoparametric Shell Element 401

G. R. Cowper: Gaussian Quadrature Formulas for Triangles 405

W. C. Carpenter: Analysis of Plates on Elastic Foundations 408

Letter to the Editor 410

Announcements 410

Issue No. 4, 1973

P. Pedersen: Some Properties of Linear Strain Triangles and Optimal Finite Element Models 415

J. T. Baldwin, A. Razzaque and B. M. Irons: Shape Function Subroutine for an Isoparametric Thin Plate Element 431

E. A. Verner and E. B. Becker: Finite Element Stress Formulation for Wave Propagation 441

W. J. Gordon and C. A. Hall: Construction of Curvilinear Co-ordinate Systems and Applications to Mesh Generation 461

W. T. Segui: Computer Programs for the Solution of Systems of Linear Algebraic Equations 479

H. Kardestuncer: On the Generalization of Equicofactor Matrices 491

Y. Yamamoto: Rate of Convergence for the Iterative Approach in Elastic–Plastic Analysis of Continua 497

K. K. Gupta: On a Combined Sturm Sequence and Inverse Iteration Technique for Eigenproblem Solution of Spinning Structures 509

L. A. Schmit, Jnr. and B. Farshi: Optimum Laminate Design for Strength and Stiffness 519

B. L. Pierson and S. S. Russell: Further Discrete Variable Results for a Panel Flutter Optimization Problem 537

W. Kobza: Multiangular Elements in Plate Bending 545

SHORT COMMUNICATIONS

K. K. Gupta: Author's Reply to a Recent Discussion 553

B. Downs: Direct Iteration of Ascending Natural Frequencies of Vibration without Inversion of the Stiffness Matrix 554

P. D. Smith: Semigroup Schemes for Dynamic Problems 556

M. M. Gupta: A Discussion of Papers by D. B. Spalding and A. K. Runchal . . . 560

G. R. Thomas: A Variable Step Incremental Procedure 563

G. G. Belford: On an Integration Method for Solving Boundary Value Problems . . 566

G. Venkateswara Rao and I. S. Raju: An Inhomogeneous, Tapered Finite Element . 568

M. F. Yeo: A More Efficient Front Solution: Allocating Assembly Locations by Longevity Considerations 570

M. A. Eisenberg and L. E. Malvern: On Finite Element Integration in Natural Co-ordinates 574

H. M. Haydl and A. N. Sherbourne: Exact Mises Limit Loads for Cylindrical Shells 575

R. E. Newton: Degeneration of Brick-type Isoparametric Elements 579

Table of Contents, Volume 7 585

Author Index 589

INTERNATIONAL JOURNAL FOR NUMERICAL METHODS IN ENGINEERING, VOL. 7, 589–590 (1973)

AUTHOR INDEX, VOLUME 7

Aguirre-Ramirez, G., and Oden, J. T.: Finite element technique applied to heat conduction in solids with temperature dependent thermal conductivity, 345
Anderson, E. C., and Lewis, C. H.: Non-reacting and equilibrium chemically reacting turbulent boundary-layer flows, 3

Baldwin, J. T., Razzaque, A., and Irons, B. M.: Shape function subroutine for an isoparametric thin plate element, 431
Bates, C. J.: A computational technique for the efficient handling of large matrices, 85
Becker, E. B.: see Verner, E. A., 441
Belford, G. G.: On an integration method for solving boundary value problems, 566
Belytschko, T., and Hsieh, B. J.: Non-linear transient finite element analysis with convected co-ordinates, 255
Bindon, J. P.: Stability and convergence of streamline curvature flow analysis procedures, 69
Bon, C.: see Sander, G., 379
Boyle, E. F., and Jennings, A.: Accelerating the convergence of elastic–plastic stress analysis, 232

Carpenter, W. C.: Analysis of plates on elastic foundations, 408
Chesnokov, S. S.: see Vysloukh, V. A., 185
Cheung, Y. K.: see Harrison, D. G., 287
Chow, T. S., and Kowalik, J. S.: Computing with sparse matrices, 211
Collins, I. F.: see Dewhurst, P., 357
Cook, R. D.: see Takemoto, H., 401
Cooke, C. H.: A characterization of stiffly stable linear multistep methods, 117
Cowper, G. R.: Gaussian quadrature formulas for triangles, 405

Desai, C. S., and Johnson, L. D.: Evaluation of some numerical schemes for consolidation, 243
De Silva, B. M. E., and Grant, G. N. C.: Comparison of some penalty function based optimization procedures for the synthesis of a planar truss, 155
Dewhurst, P., and Collins, I. F.: A matrix technique for constructing slip-line field solutions to a class of plane strain plasticity problems, 357
Downs, B.: Direct iteration of ascending natural frequencies of vibration without inversion of the stiffness matrix, 554

Eisenberg, M. A., and Malvern, L. E.: On finite element integration in natural co-ordinates, 574

Farshi, B.: see Schmit, Jnr., L. A., 519

Ganesan, K., Moore, E., and Vetter, W. J.: On convergence of Newton's method for load flow problems, 325
Geradin, M.: see Sander, G., 379
Gordon, W. J., and Hall, C. A.: Construction of curvilinear co-ordinate systems and applications to mesh generation, 461
Goss, W. P.: see Milton, J. L., 57
Grant, G. N. C.: see De Silva, B. M. E., 155
Gupta, K. K.: Eigenproblem solution by a combined Sturm sequence and inverse iteration technique, 17
——: On a combined Sturm sequence and inverse iteration technique for eigenproblem solution of spinning structures, 509
——: Author's reply to a recent discussion, 553
